Product Overview

Proudly presented by Enhance Technology, the EnhanceRAID™ T5 is a desktop Disk-2-Disk (D2D) Backup Appliance with built-in OS transparent RAID engine that targets SMB, Workgroup, and Departmental backup usage. It is a preconfigured RAID storage system that wraps five SATA disks into one RAID (0, 1, 3, 5) protected disk, while connecting to the high bandwidth Ultra320 SCSI port. One additional 5.25" standard bay is reserved for Tape (D2D2T) or other storage media (DVD or HD-DVD) for offline backup purpose. The EnhanceRAID™ X5 is ideal for Microsoft Exchange and SQL server, and provides the fastest, simplest, safest way to share protected data between desktops, networks and work groups.

Easy Management

EnhanceRAID™ T5 system is unparalleled in its simplicity, easy of use, installation, and storage management. Our user friendly Web Graphical User Interface allows one to deploy and manage the disk array from virtually anywhere in the world with simple internet access, no additional management software ever needed. With the "Quick Install" wizard, the storage administrator can get the system up and running in a few minutes; and setting up RAID level, volume, cache, etc. can all be done and monitored through the Web GUI.
