## Hot-swap Desktop Backup Solution

. Enhance-tech

### Why Tape?

- *eXchange™ stores more than a tape*
- *eXchange™ runs faster than a tape*
- *eXchange™ functions as a tape*
- *eXchange™ saves more \$\$\$*

### Overview

Introducing the new generation of eXchange™ Box, EE950 v. 5.0, that stores data to 80GB, 160GB, or 250GB of hard drive. With the removable drive tray, the eXchange™ Box not only stores data, music, picture, and your favorite movie, it allows the exchange of your digital content with your friends, family, and colleagues or swapping data between desktop and notebook.

This sleekly re-designed eXchange™ Box is a protected storage solution through the bundle of the award-winning BackupSwap™ v. 5.0 (retail value at \$49.95) software, which backups and restores all your important data manually or automatically. EXchange™ is more than any other external hard drive on the market, the eXchange™ Box drive cartridge design enables multiple hard drives to be used as an archive option.

Equipped with both USB 2.0 and FireWire 1394 ports for fast access, the eXchange™ EE950 can transfer data at a blazing 480Mbps per second, and is compatible with most of the operating systems such as Windows, Mac, and Linux.

### Features
